EXPERIENCE

FORTO LOGISTICS SE & CO. KG, BERLIN
Senior Software Engineer (UI Platform)

May 2022 - PRESENT

Working as senior front-end engineer in the UI Platform team.

Tools and technologies include: **React, Typescript, Material UI, Nodejs, webpack, Storybook, Datadog, CircleCI, Jest, Cypress, Figma**

Summary:

- Collaborated with the design team to develop a design system for stunning UIs.
- Improved pipelines for cost-effective project delivery.
- Created a token-based design system integrating GitHub and Figma for seamless updates.
- Automated code metrics tracking with Datadog integration.
- Facilitated a gradual migration from Material UI v4 to v5.
- Made significant contributions to the components library (React, MUI, Storybook).

ONE.COM, DUBAI
Senior Programmer

May 2016 - April 2022

Worked on front-end and backend development of Webshop (https://www.one.com/en/webshop)

Technologies included: **React, Knockout.js, Javascript, HTML5, , NodeJS, PostgreSQL**

Summary:

- Developed pixel-perfect UI in React based on provided designs.
- Transformed existing Knockout.js code into React.
- Created API handlers in Node.js and managed PostgreSQL queries.
- Integrated Stripe payments (Credit card, iDEAL, Giropay).
- Served as the liaison between a team of 5 developers in Dubai and the Project Manager in Copenhagen.
- Monitored Sprint progress and communicated changes to the product manager.
